Shot List Methodology:							
1) Restaurant scene needs to be shot first because some footage needs to be edited for playing on steenbeck in Arty Suite.							
2) Shots needed for the steenbeck shall be shot on the first day to allow editor 2.5 days to compose DVD for Arty Suite shoot.							
3) Organize 2-day shoot in restaurant so that we are shooting into the back of the restaurant early and towards windows at the end of the day. This will allow the shoot to start during the day instead of being a total night shoot, therefore, allowing the whole production to not be a full night shoot.							
4) Shoot out-of-sequence to combine shots from different scenes and take advantage of repetition inherent to script.							
5) Finish scenes with most extras and leads early in production.							
6) Combine shots to eliminate multiple lighting changes in suite sets.							
7) Combine steadicam operator shots together.							
Shots done prior to Principal Production
